Wentworth is a global leader in mold manufacturing and plastic processing, passionately focused on driving customer success. Fast, on-time delivery, complete service support, high quality mold and product performance are a given. We supply molds to produce bottles, containers, preforms, caps & closures and thinwall containers on all types of plastic molding equipment.

Wentworth is the world's No.1 independent manufacturer of injection molds and blow molds to the packaging industry. We are an approved vendor and supply the top 20 packaging companies and converters. Our service extends to over 80 countries throughout Europe, the Americas and Asia.

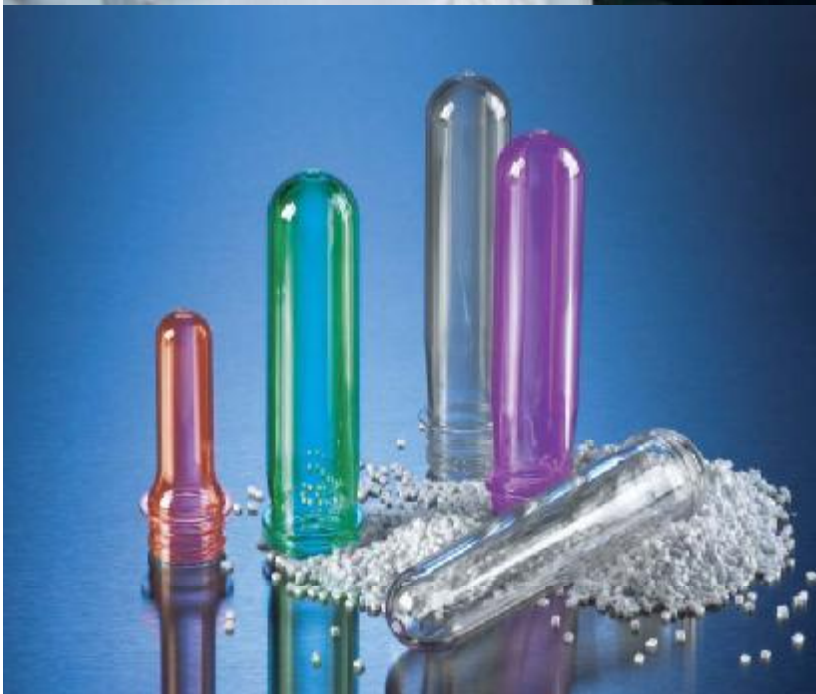

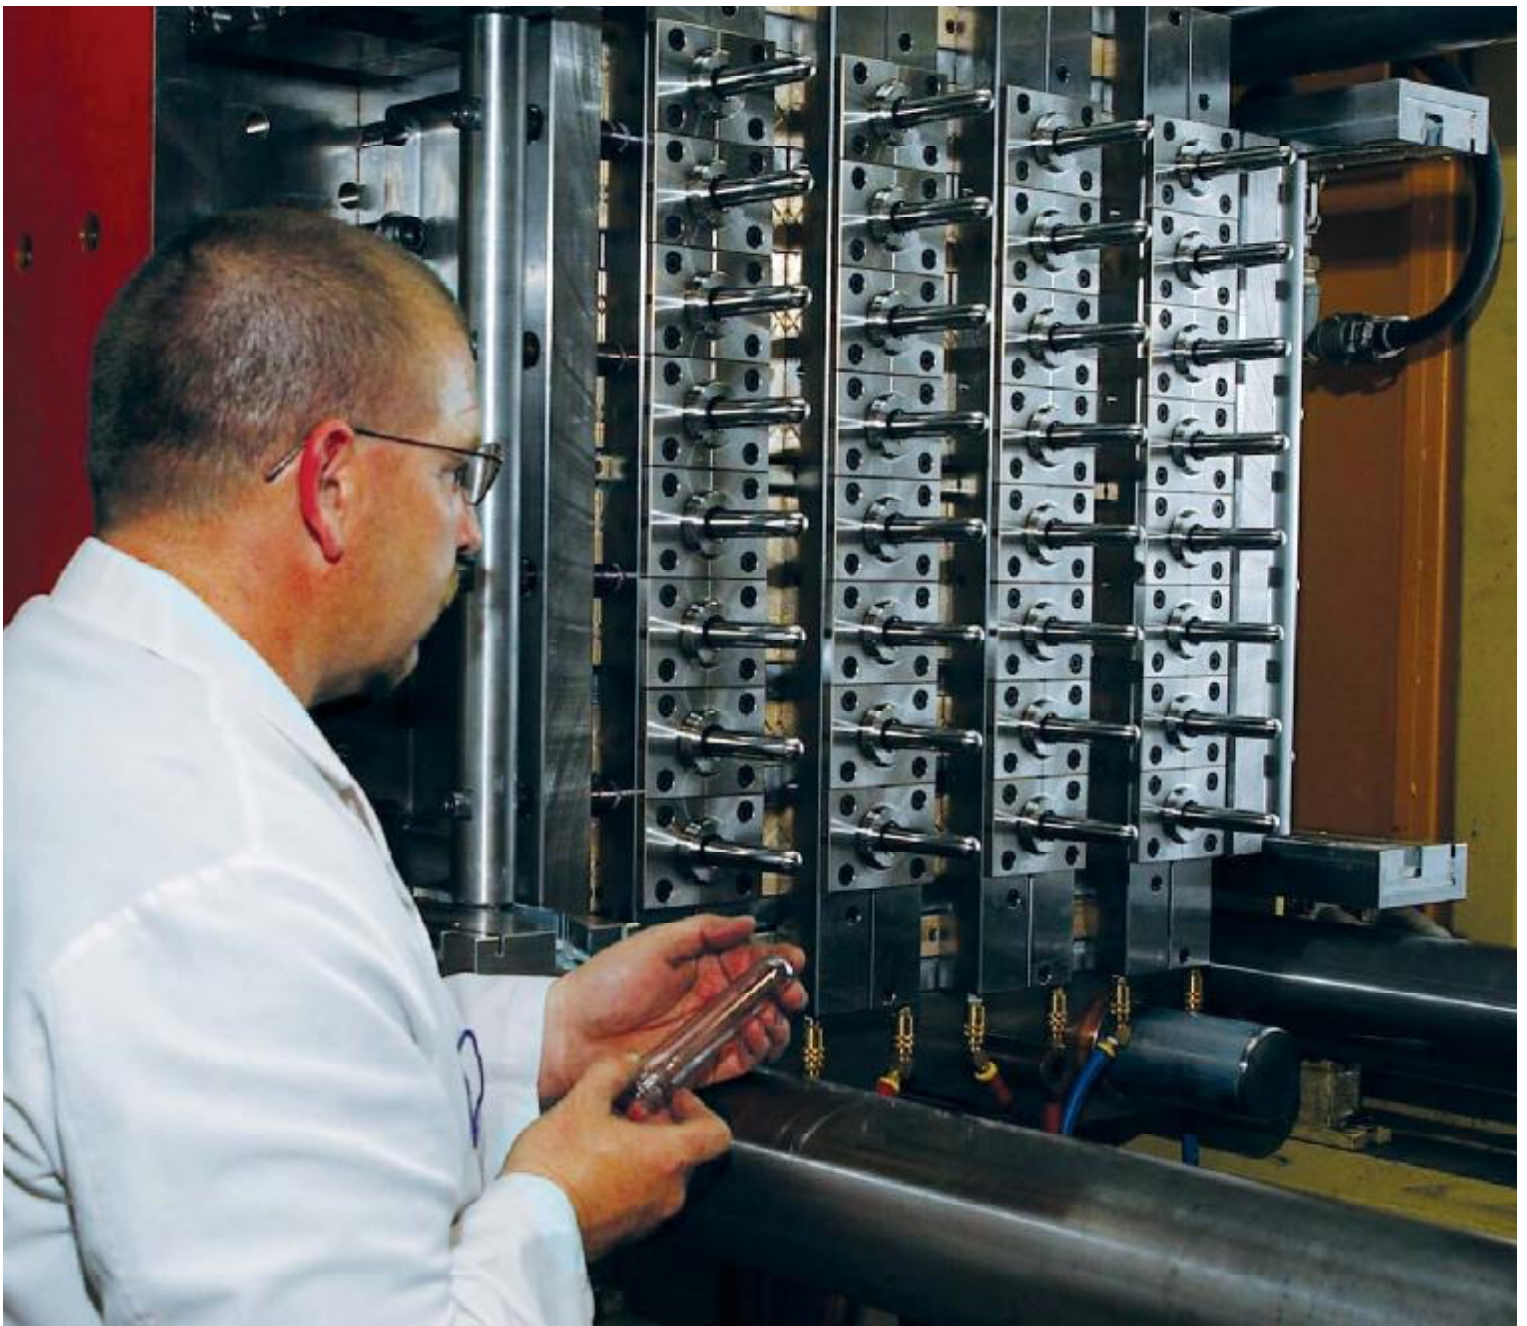

Customers can rely on Wentworth for best value mold solutions. Products and services include:

- All types of molds for packaging applications
- Fast-to-Market® (FTM®) = fastest in the industry
- 3D product design support
- Innovative proprietary mold technology
- 17 manufacturing and sales/service facilities worldwide
- Long-term strategic partnerships

Our mold solutions redefine the time to market and deliver higher profits to our customers and partners. We build reliable, high performance molds providing substantial competitive advantage. We are truly customer obsessed serving your demands. We invest over 10% of revenue in R&D and have 17 global manufacturing plants supplying technologically advanced products offering the best value, 24/7.

Preform Molds

Electra Form Industries, is the world's No.3 systems supplier in innovative design, manufacture of precision preform molds and molding systems to the PET packaging industry.

We provide the fastest delivery of molds and services, and are uniquely the only ISO 9001 certified preform mold supplier globally. EFI molds are the easiest to maintain (in and out of the injection machine), in the industry. Many of our customers rate our molds the best for maximizing machine uptime.

We supply new molds and molding components to the PET packaging industry, complete refurbishment for EFI and non-EFI preform molds, sampling capabilities and local service.

electra form industries
Preform molds

Product offerings include:

- Preform molds from single cavity to 144 cavities
- Fast-to-Market® (FTM®) - fast market introduction for new product designs
- Fastest mold conversions and refurbishment programs to re-tool and revitalize all types of preform molds
- PET Hot Runner Systems
- Emergency tool room repair service
- Post mold cooling systems
- Prototype preform production

We firmly believe in working closely in partnership with our customers on every project from concept to final product. We consider personal service, before and after delivery, a major factor in establishing and maintaining long-term relationships. We support every EFI product by our commitment of thorough, precisely designed and managed projects, including complete isometric instruction manuals and parts listing.

We also offer on-site maintenance and training programs to customers, and in-house classes.

Injection Blow Molds

Electra Form through its predecessor Jersey Mold has been a pioneer and a leader in the design and manufacture of injection blow mold (IBM) tooling solutions since the mid 1970's. We are recognized as a customer focused vendor supplying high quality performance molds and sampling capabilities. Our molds are designed to run on typical IBM machines such as Jomar, Rainville, Uniloy, Wheaton and other types.

We supply IBM tooling to manufacture bottles and containers for cosmetics, food containers, personal care products and pharmaceutical products.

Electra Form offers products and services including:

- 3D product design support
- Complete mold engineering services
- State of the art CNC manufacturing operations
- Full inspection and mold assembly drawings
- Sampling capabilities
- Service response within 24 hours

We have delivered IBM tools to key OEM's and converters in the Americas and Europe. Our flexibility to service customer demands of delivery and provide real innovative solutions resulted in Wentworth Tech Inc. acquiring the business in 2002. Since then Wentworth has introduced its best practices of customer obsession, best value tooling, innovative mold design, lean manufacturing and local service.

For more information please visit our website at: www.wtbvc.com

“Our blow molds are used to process PET bottles and containers for CSD beverage, water, juices, isotonics, food, alcoholic beverages, liquor and other unique applications.”

PET Blow Molds

Wentworth is the world's No.1 independent supplier of blow molds for the manufacture of PET bottles and containers. We have been at the forefront of the PET packaging business supplying over 50,000 cavities since mid 1970's and have continually provided innovative solutions since then.

We supply conventional and "Quick-change" blow molds for ADS, Kronos, Mag, Sidel, SIG, Sipa and other leading blow molding machines.

We help customers find solutions to their molding and processing problems by offering products and services in:

- 3D product design
- Fast-to-Market® (FTM®) unit prototype molds delivered in days
- Joint development of proprietary technologies
- Interchangeable "Combo" molds to run on different blowing machines
- High precision CNC machining with lean manufacturing methods
- Global capacity capable of supporting large and small blow mold programs
- Local service that responds within 24 hours

PET blow molds

Our blow molds are used to process PET bottles and containers for CSD beverage, water, juices, isotonic, food, alcoholic beverages, liquor and other unique applications. With this extensive experience we have developed and patented technology for Quick Mold Systems (QMS), mold carriers, "Quick-change" molds for heatset/hotfill applications and many more.

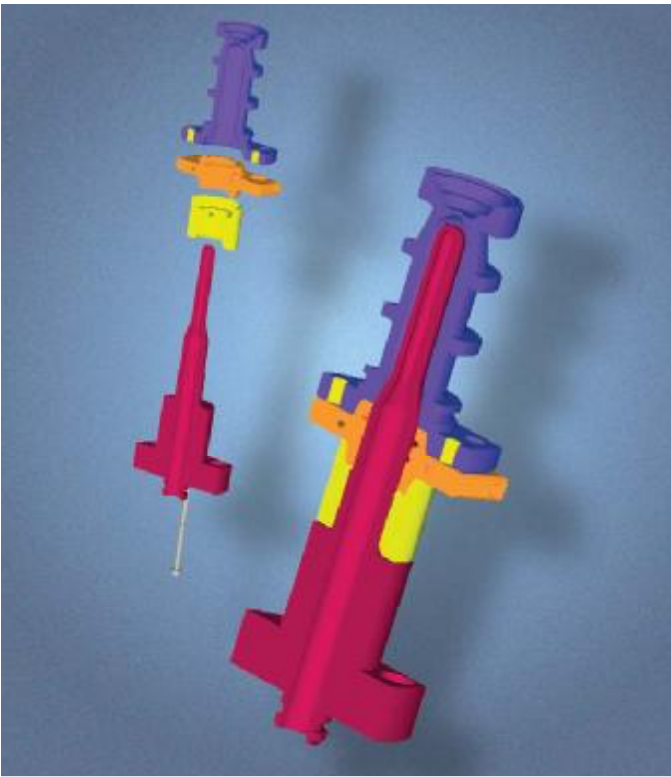

We are an approved vendor to the world's leading beverage and water companies, as well as strategic supplier to the top 10 PET converters in the Americas, Europe and Asia.

"The fastest in the PET tooling industry. Prototype unit molds delivered in days, consistently"

Fast-to-Market®

The faster your product moves from concept to market, the faster it generates profits for you. Electra Form Industries and Wentworth Mold Ltd. have developed a proprietary **Fast To Market®** (FTM®) program, responding to our customer need for accelerated introduction of new products.

The **FTM®** program is unique in the PET beverage industry, providing the fastest delivery in days for prototype preform stacks and unit blow molds.

The FTM® program includes:

- Fast, effective communication
- Dedicated project teams
- Simultaneous design automation and manufacturing
- 24/7 operation utilizing latest, advanced CNC technology
- Standard FTM®, FTM® Plus and FTM® Enfusion services for preform stacks
- FTM® Hot, FTM® Cold and FTM® Express services for unit blow molds
- Web based ordering
- In-house sampling capabilities

Fast to Market®

The **FTM®** program is proven, and has benefited customers by responding faster to new opportunities, offering competitive advantage, reducing development costs and resulting in increased market share.

wentworth mold Ltd.

Extrusion Blow Molds

Since the early 1960's Wentworth has been supplying extrusion blow molds both for monolayer and CoExtrusion applications in HDPE and PP. We have supplied over 75,000 blow mold cavities for containers such as household detergents, cleaning fluids, oil canisters, personal care, cosmetics, food applications and many more.

We provide our customers with 3D product design support, manufacture molds for shuttle, long stroke, wheel and Plax/BDS blow molding machines and sample prototype molds for new containers.

Before we design an extrusion blow mold we verify with our customer key features such as:

- Machine mounting of the mold onto the machine platens
- Mold feature such as blow dome, striker plates, IML, detabbers, etc.
- Types of mold materials to be used optimizing mold performance
- Pinch-off details to strengthen weld lines and improve product integrity
- Optimized mold cooling layouts to maximize outputs per blow cavity
- Mold surface finish e.g. sandblast grit, vapour honed or highly polished
- Engraving requirements e.g. customer artwork, logos, etc.

Wentworth is recognized for its innovative mold designs through the use of new materials, optimized mold cooling and high tolerance CNC manufacturing operations. We are an approved vendor to the key packaging OEM's and the top 10 regional converters, worldwide.

Our global operations allow us to coordinate large and small programs, provide local support, including fast service response from our dedicated team of toolmakers and engineers. We can support mold modifications in one of our global facilities to ensure customer machine uptime is maximized or we do it on-site at the customers plant.

For more information please visit our website at:
www.wentworthmold.com

"We provide real innovative solutions and the fastest delivery in the industry."

global service & local support

Our customers can be assured that we will be there when and where we are needed. With 8 mold manufacturing and service centers in N.America, Europe and Asia our global presence enables us to provide molds that perform from installation through day-to-day operation ensuring your production runs 24/7.

We pride ourselves on our proactive culture and capability to do whatever it takes to meet or exceed customer expectations. We encourage our service teams to partner with you, to learn all aspects of your business enabling them to provide optimized solutions for your molding operations.
